

What is Blue?

*Blue is the blizzard on a windy day.
It is the hail stones pattering.
It makes the frost shy away
as it starts to wet the ground.*

*Blue is the fifth colour in the rainbow
as it comes on a rainy day.
It's the blue that makes the sea flow
on a misty morning in May.*

*Blue is the taste on your tongue in
embarrassment.
It's the bubblegum ice-cream you eat.
It is the love that makes you content
and the parents who love you a treat.*
